My Portfolio

Education

Bahrain Polytechnic
Bachelor's of Programming
2022 - 2026

New Vision School
Science Stream
2019 - 2022

Skills

Teamwork & Leadership
Full-Stack Development
Database Management & SQL
PostgreSQL
SSMS
Object-Oriented Programming
C#
Java
Swift
HTML/CSS/ JavaScript
Python
PHP

Language

English - Fluent
Arabic - Native

THURAYA ALSATRAWI

Software Engineer

Profile

Graduate Software Engineer with experience developing web, desktop, mobile, and AI-powered applications. Enjoy solving technical problems, learning new technologies, and building software that is reliable, practical, and easy to use.

Work Experience

02/25

-
07/16

Bank ABC - Internship

IT Department - Payment Transactions

- Validated payment transaction processing using TMS/X.
- Investigated transaction failures and verified system behavior.
- Developed an AI-powered anomaly detection web application for financial transactions.

Technical Projects

*Private GitHub repositories available upon request.

AI Transaction Anomaly Detection Platform

- Python, HTML, CSS, SQL, FastAPI, Uvicorn, PostgreSQL, SQLAlchemy, PyTorch, Scikit-learn, Isolation Forest, One-Class SVM, Autoencoder, Pandas, NumPy

Developed an AI-powered payment transaction anomaly detection platform featuring real-time fraud detection, behavioral analysis, and an administrative dashboard.

ReShelved

- C#, HTML, CSS, SQL, JavaScript, Visual Studio

Developed a full stack bookshop management system using C# and Visual Studio with a student web portal, staff desktop application, SQL database integration, and administrative reporting features.

Origins of Rosèvelt

- C#, Unity

Developed a Unity game using C#, implementing player movement, combat mechanics, enemy AI, and level progression.

Glow Events

- Swift, XCode, Firebase

Built a native iOS event management application in Swift, emphasizing usability, responsive interface design, and efficient event browsing and organization.
